

### **For iPhones**

Go to Settings

Wifi

Touch Other

Type in; Msc-private (it is case sensitive)

Touch Join

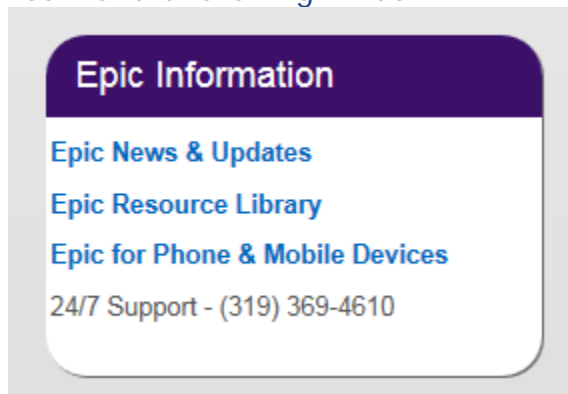

### **For Android phones**

please add a new network Msc-private  
(it is case sensitive)

It may take several tries, and it has been my experience you should be located on 1<sup>st</sup> floor or above at MMC to try this.

Also, reminder, if you would like you can add Epic Haiku App to your phone (must be an Apple 5S or above)

- Download the app thru App store, Epic Haiku
- Once it is downloaded, you can go to <https://p.mercycare.org>
- Look for the following window

Click on the link "Epic for Phone and mobile devices"

- Touch the Haiku icon for the iPhone OR for the Android device, and it will auto configure

If you have any questions please call our IT service desk at 319-861-7777

Let them know your mobile device has been set up on the Private network Msc-private and you are experiencing issues in which you need some assistance.

Thank you
